

Used Oil Identification Guide

Waste derived from oil products listed below are recyclable and should be labeled as “used oil” even though their flash point and other characteristics (reactivity, toxicity, or corrosivity) meet the hazardous waste criteria unless they are mixed with other hazardous waste.

Waste oil that DO NOT contain the following substances are considered recyclable oil:

1. Oil products mixed with gasoline or solvents
2. Oil products that contains ethylene glycol
3. Water soluble oil
4. Silicon based oil

Unlike hazardous waste, used oil can be accumulated more than 208 liter or 55 gallons as long as they are properly segregated from other incompatible items. Used oil must be turned in to FLEACT Yokosuka PWD Hazardous Waste Yard at Bldg 1822 within one year from start of accumulation.

Here is a list of oil products that are recyclable. This list is not exclusive and if you are in doubt, please contact FLEACT Yokosuka PWD Environmental HW Division (243-5777 or 243-3840) . Please have a copy of MSDS ready with you.

廃油と USED OIL の見分け方

使用済みオイルでリサイクル可能なものは **Used oil** として分類されます。たとえ、引火点やその他の特徴（反応性、毒性、腐食性）が有害廃棄物に該当しても、他の有害廃棄物と混ぜない限り、**Used oil** として分類します。次に挙げた 4 種類のオイル以外はリサイクル可能です。

1. ガソリンや溶剤が混ざっているオイル
2. 内容成分にエチレングリコール入ったオイル
3. 水溶性のオイル
4. シリコンベースのオイル

Used oil の保管期限、保管量上限は有害廃棄物よりも長く、多くなっており、1年以内の保管、208 リッター（55 ガロン）以上の保管が可能です。**Used oil** は漏れ受け等の設備を使用して適切に他の有害廃棄物と分けて保管し、集積開始から 1 年以内に廃棄して下さい。

下記にリストアップされたオイル類は **Used oil** です。このリスト記載されていなくても **Used oil** となることもありますので、わからない場合は **MSDS** を用意して有害廃棄物ヤード（243-5777）まで問い合わせください。
