Notes:

* Field duplicate was collected with the sample; the result for the original sample is reported.

[†] PFOS and PFOA are summed when both compounds are detected.

$\mu\text{g/L}$, ppb = micrograms per liter, parts per billion ng/L , ppt = nanograms per liter, parts per trillion DL = detection limit

ID = identification

LHA = lifetime health advisory LOD = limit of detection

LOQ = limit of quantitation

PFBS = perfluorobutane sulfonate PFOA = perfluorooctanoic acid PFOS = perfluorooctane sulfonate Q = data qualifier

Sample results are presented in order from highest to lowest PFOS and PFOA concentration.

J = Analyte present; value may or may not be accurate or precise. U = The material was analyzed for, but not detected.

0.010 $\mu\text{g/L}$ = 0.010 ppb = 10 ppt

There is not a health advisory level for PFBS; therefore, no action is currently being taken based on this result. This chemical has health effects information that can be used to evaluate potential impact under the Navy's Environmental Restoration Program.

PFOS and/or PFOA not detected

PFOS and/or PFOA detection less than the EPA LHA (70 ppt)

PFOS and/or PFOA detection greater than the EPA LHA (70 ppt)
