

Title: Off-Base Drinking Water Well Sampling near Naval Base Kitsap (NBK) Manchester Open House

The Navy is conducting drinking water well sampling near NBK Manchester beginning in June 2023. The sampling is for certain per- and polyfluoroalkyl substances (PFAS), which may be present in these drinking water wells due to past use of firefighting foam, or other PFAS-containing materials, on base.

We invite you to attend an Open House on Tuesday, June 13, 2023 any time between 5:00 pm and 7:00 pm at the Parkwood Community Club located at 3045 Madrona Dr SE, Port Orchard, WA 98366. We will have informational displays about this sampling along with representatives from the Navy, U.S. Environmental Protection Agency, Agency for Toxic Substances and Disease Registry, Washington State Department of Ecology, Washington State Department of Health, Kitsap County Public Health District, and Manchester Water District available to answer questions you may have.

If you have a drinking water well on your property or share a drinking water well and your well is located within the sampling area, the Navy would like permission to sample your drinking water well at no cost to you. You may schedule a drinking water well sampling appointment by calling 1-855-PFAS-MCR (1-855-732-7627) and leaving a message with your name, property address, and telephone number.

We are committed to keeping the public informed of the Navy's drinking water sampling. For more information, please visit our website at: <https://www.navfac.navy.mil/manchesterpfas>.
