Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Lisa Stead  
PO Box 51  
Jeffersonville, VT 05464

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

I spent time in the Superstition Wilderness in Arizona when the military flew aircraft over the Wilderness. The sound and disturbance was very disturbing not only to people but to wildlife as well. Please do not repeat this type of action.

Thank you.  
Patti Stieger

Dear,

Dear Naval Facilities Engineering Systems Command Northwest:

Thank you for accepting my comments as follows on the Draft Environmental Assessment (EA) for the proposed Eastern Washington Airspace Extension:

The Draft EA inadequately analyzes impacts on Wilderness areas. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but have not yet been adequately analyzed in the EA. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude. Furthermore, the air pollution from the jets' engines will spread out over wide areas, including any and all Wilderness areas the jets fly over, and fall to the ground and contaminate and irreparably harm those areas and the people and animals therein (there is no safe level of air pollution).

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It erroneously assumes that people only come to visit Wilderness areas on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence and seek periods of calm from their busy weekday routines.

Wilderness areas are also for wildlife. These areas were set aside to provide for their security, well-being, and conservation/recovery. The sounds from military aircraft will certainly disrupt their behaviour and cause unneeded stress, which may amount to "take" under section nine of the Endangered Species Act (ESA). You can give them a break by keeping training facilities well away from Wilderness areas and not flying over or near them.

The No-Action Alternative is the best alternative analyzed in the Draft EA. Please select it as the proposed alternative.

If this project is going to move ahead, then a full and legally-adequate environmental impact statement (EIS) must be conducted beforehand to identify and fully analyze all the impacts from the proposal, including and especially those to designated Wilderness areas.

The boundaries of all existing Military Operations Areas (MOAs) and Air Traffic Control Assigned Airspaces (ATCAAs) should be re-analyzed and re-drawn to eliminate all overlap with, and adjacency to, designated Wilderness areas.

Thank you again for accepting and considering my comments.

Sincerely,  
David Pedersen

Dear,

Dear U.S. Navy personnel,

I am writing to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will certainly be disturbing to both humans and animals who are in the wilderness seeking nature and peace.

Noise impacts on human visitors will occur during the week; those impacts should not be disregarded.

We have "lost" so much wildlife to habitat loss/development, climate change, and other human activities in the last five decades that we need to protect the wildlife that remains, especially in designated wilderness areas. Many studies have shown that aircraft noise is disturbing to wildlife and increases stress, which can impact reproduction, denning, feeding, and other activities.

Please choose the No Action Alternative in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

Please redraw boundaries of all existing MOAs and ATCAAs to eliminate all overlap with designated Wilderness areas.

Thank you for your consideration.

Sincerely,  
Judy Schultz

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Kat Bainbridge

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

I lived on the edge of a wilderness area very near these areas for a year in the 80s. Occasionally a military jet would fly below the mountaintops (against the rules) and it was horrendous. I would shake my fist, but that's all I could do. The law must handle these situations.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Maya Kurtz

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Dale Peterson

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Janet Tatz

**Date:** Monday, February 19, 2024 7:57:30 PM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Patricia Kortjohn

**Date:** Monday, February 19, 2024 3:16:59 PM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Jim Krebs  
2002 Stockton Road  
Phoenix, MD 21131

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension. The reason for my comments is my distress over the default practices of our federal agencies and entities: now you are practicing target management with disregard--yes?--for the wild lands and wild life and their values to our spirits and our lives. You folks know the science. You folks know that we humans are everywhere because we think Everywhere is ours. Please act with integrity.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

**Date:** Monday, February 19, 2024 12:23:16 PM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
CR Maddy  
7324 Donet Dr NE  
Rio Rancho, NM 87144

Dear,

Dear U.S. Navy personnel,

I submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension. I have lived and explored in that area. It is a priceless web of natural resources, not the least of which is the quiet.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is specious. That rationale assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

In addition to the undeniable sonic disturbance, there is also air pollution from the unburned and burned hydrocarbons of the engines. There is also chaf and other potential debris from military exercises. This all impacts the plants and animals of the area, and the humans who are there in increasing numbers to seek wilderness peace and clarity.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

**Date:** Monday, February 19, 2024 9:40:13 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Audrey Brown  
6691 Kimesville Rd  
Liberty, NC 27298

Dear,

To Whom it may Concern among U.S. Navy personnel,

I respectfully would like to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife -- I would argue primarily so. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Please give them a break -- they face enough threats from human presence and the effects of climate change.

The No Action Alternative is, I believe, the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you for considering my concerns.

Sincerely,  
Marianne Mukai

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Bottom line is, enough. We are losing species, plant and animal, daily. We have so many military messes to clean up in my own city of Tucson with contamination from careless practices. It's time to think of the planet since we obviously don't want to recognize that its destruction is our greatest threat. Just STOP! DON'T MOVE AHEAD!

Thank you.

**Date:** Monday, February 19, 2024 5:44:35 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Ireneusz Kryczka  
356 North Street  
Chicago, IL 60411

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Tobin Quereau  
4711 Spicewood Springs Rd. Unit 273  
Austin, TX 78759

Dear,

I FULLY SUPPORT the letter from Wilderness Watch below. I live in Methow Valley, Okanogan County, WA, and recognize the serious concerns with the proposed Navy Airspace Extension.

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Saundra Hodges

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Michelle Schlaiss

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Sally Vogel

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude and annoy the living hell out of existing wildlife.

Dismissing noise impacts on human visitors and animal life because most jets would fly Monday through Friday is inadequate. It assumes that people and animals only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Norman Baker

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Budd Berkman

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

First, thank you for your service to our country. Secondly, the wilderness belongs to all Americans. Wilderness includes all the species - plant, animal and more, and it also includes the sights and sounds of wilderness only. My family and millions of other Americans greatly love and value our wilderness places. We do not want any of these designated wilderness areas to be filled with manmade sounds from machinery to airplanes. Americans from all over the country use their precious savings and vacation time to enjoy the solitude and beauty of the wilderness. No one, nor the animals, should have to hear manmade noise.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Laura Booth

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
victoria.pastor

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

I and my family frequently camp and hike in the Adirondacks of New York, and the military jets practicing dog-fighting overhead are very disturbing, detracting from our enjoyment and study of the wilderness. Please don't impose this racket on Washington State.

Thank you.

Sincerely,  
Alan McKnight

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
David Soares

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

Having lived on a Navy training base (NAS Kest West) and next to it in a Marine Sanctuary zone, I understand both sides of this issue and feel the following needs to be said:

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise does cause temporary human hearing damage on the ground and shatters solitude and I say this from having experienced it personally.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is completely inadequate. People do NOT only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Sandra Butler  
8134 Westlawn Ave  
Los Angeles, CA 90045

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude. It will harm wildlife. It can make it so that no one can visit the wilderness anymore.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It's cruel and disrespectful. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break! It is unbearable that our country puts war and preparing for war above everything else. It is unbearable that more and more of our land is made into sacrifice zones to prepare for still more war, despite the fact that war solves nothing and just leads to more war. When will our country stop sacrificing everyplace and everyone in the name of still more war.

The No Action Alternative is the best choice in this Draft EA. In fact it is the only acceptable choice.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness. I also wonder whether any or all of this land is sacred space for any Native American tribes. Typically their rights are totally overlooked so I can't help wondering.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Karen Jaques

**Date:** Saturday, February 17, 2024 6:03:02 PM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Chaz Huffman  
124 Iliwai Loop  
Kihei, HI 96753

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

I have personally experienced sudden military jet flyovers in my wilderness area home, and I can tell you it's enough to make me jump out of my skin! It is EXTREMELY LOUD and close, and upsets my nervous system for quite awhile after passing. I can only imagine the deleterious effects on wildlife, since we never bother to study this impact. PLEASE study this before assuming it is benign. It is extremely invasive.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

I live 20 miles out of Chelan and can attest to the noise we experience already, as the jets fly down the Lake Chelan Valley. Research documents wildlife habitat shifts and changes in time spent feeding, in addition to change in reproduction patterns.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Patrick Quinn

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Corry Paul

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

I am a Washington State resident and I am appalled at the casual way the two favored alternatives are written, which if enacted would clearly violate the Wilderness Act. Do your job of protecting Wilderness Areas, and quit pandering to the selfish and illegal wishes of the US Navy.

Thank you.

\*\*\*\*\*

Years ago I was in a wilderness area when a large military aircraft appeared about 50' off the ground. It scared the shit out of me. I do not want that anyone in the wilderness to experience that. There was no civilian authorization for that flight in the northern Sangre de Christos in New Mexico, and I believe that Pat Lyons, a New Mexico legislator at that time raised a complaint about ultra-low military overflights in that area. He may have even introduced legislation to prevent it from happening again, but it's been too long ago to remember if he did.

\*\*\*\*\*

Thank you.

**Date:** Saturday, February 17, 2024 9:33:10 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Craig Leymaster  
1918 Lake Heron Lane  
Boise, ID 83706

Dear U.S. Navy personnel,

Please accept my comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

I believe the Draft EA inadequately analyzes impacts on Wilderness. For example, solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Furthermore, wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress.

I believe the "No Action" Alternative is the best choice in this Draft EA.

Additionally, a full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

Finally, the boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you for considering my comments on this important issue.

Sincerely,  
Eddie Konczal  
22 1st Avenue  
Monroe Township, NJ 08831

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension, writing as someone who frequents both the Pasayten and Lake Chelan-Sawtooth Wildernesses.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude. I can share that my experiences with this situation in the nearby Glacier Peak Wilderness are profoundly startling and negative.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence. From May into October, it is not uncommon for me to spend a full week in either of these Wildernesses.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break! This is especially relevant considering the pending reintroduction of grizzly bears to the North Cascades ecosystem.

The No Action Alternative is easily the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses. The Navy exists to protect American citizens, not to degrade their quality of life.

Thank you.

Sincerely,  
James Scarborough

**Date:** Saturday, February 17, 2024 6:22:33 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Kelli Rey  
PO BOX 1131  
Ruidoso, NM 88355

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is short sighted to say the least. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.(I add here that I am very weary of and discouraged by the arrogance that human decision makers demonstrate in such matters, basing their decisions on human comfort and convenience, rather than broadening their awareness and fully recognizing the negative impact their decision can have on the wildlife and plant life in the impacted areas. It's not all about us humans, from whom Wilderness and its 24-7 inhabitants deserve serious not "convenient" half-hearted protection.)

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

**Date:** Saturday, February 17, 2024 4:14:32 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Susan Tansley  
Shuttlewood rd bolsover  
Chesterfield, AZ 20000

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness:

Solitude and quiet are wilderness values identified and protected by Congress.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is not fair. It assumes visitors only visit Wilderness on weekends. Those who come during the week often do so to maximize opportunities for beauty and solitude.

Wildlife need wilderness. It is set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and analyze all impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate overlap with designated Wildernesses.

Thank you.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Monica Wiesener

Dear,

Dear U.S. Navy personnel,

Our "pocket" of America prides itself on being known as the "Ever Green State", and so I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

**Date:** Friday, February 16, 2024 6:44:40 PM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Carol Whitehurst

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Jacqueline Birnbaum  
311 Bronxville Rd  
Bronxville, NY 10708

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Dennis Rice

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

For myself as a retired civilian I visit the wilderness during the week as do many of my contemporaries. Flyby's by Navy jets and/or helicopters would destroy the solitude and quiet we go there for. Also many of the people that show up during the week are dedicated bird watchers. The Naval "birds" would undoubtedly drive them off. Also many of the people that pack in during the week are veterans. Think about that please.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

I am a senior citizen and a disabled veteran.  
Thank you.

Dear,

Dear U.S. Navy personnel,

I feel strongly that Wilderness Areas should be left untouched. I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Tom Mader  
3509 Red Rock Dr  
Moab, UT 84532

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude. I have hiked every year for the past 10 years along the Pacific crest Trail and the North Cascades National Park and I cherish the solitude. The military jets scare the heck out of me and startle my solitude. I do not want any military jets anywhere I can hear them.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Orva M Gullett  
1922 Victory Rd Lot 116  
Marion, OH 43302

Dear,

Dear U.S. Navy personnel,

Both of these Wildernesses (the Pasayten Wilderness and Lake Chelan-Sawtooth Wilderness) are areas in which I have backpacked 5-7 days in the last few years. I would have felt harassed if a Growler (or other loud plane) had flown overhead. And I'm certain that wildlife would have felt the same. This noise nuisance should not be allowed in any designated US Wilderness.

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Dustin Fraszewski  
4810 Alexis rd.  
Sylvania, OH 43560

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Anita Youabian

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

**Date:** Friday, February 16, 2024 12:06:58 PM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Jo G

**Date:** Friday, February 16, 2024 11:18:29 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA is inadequate and does not analyze impacts on Wilderness. Such as:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday wrong headed. It assumes that people only come to visit Wilderness on the weekends. Which is not true. Many visit during the week to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. It is necessary to analyze affects of sudden loud noises on wildlife.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Unlike your analysis indicates many Americans value wilderness, wildlife habitat, solitude and quiet and these values are paramount in designated Wilderness not military training. Military pilot training should occur in non-wilderness areas with already disturbed visual and auditory resources.

Thank you.

Sincerely,  
Nike Stevens  
15300 Horse Creek Rd

**Date:** Friday, February 16, 2024 11:18:27 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Eve Reshetnik Brawner  
1600 Spruce Ave  
Longmont, CO 80501

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude & quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Brian Keck  
7102 Channel Dr SE  
Alto, MI 49302

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Danny Goodman

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Tom Emmott

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

Dear,

Dear U.S. Navy personnel,

I am 84 years old. Wilderness travel has been a blessed source of renewal for my physical and mental health. I have led a number of trail maintenance trips in various wilderness areas, including the Sawtooth, and have backpacked in wilderness areas of half a dozen states. Wilderness is a buffer against the trials and tribulations of our imperiled world.

Of course I want our service men and women to be adequately trained! BUT training should not destroy some of the precious characteristics of the land they swear to protect. Please read the comments below, and take them to heart.

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Georgia Locker  
713 Duke Sq  
Fort Collins, CO 80525

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness. You can't just skip full analysis of impacts on the wildlife, they are primary inhabitants of these wilderness areas and their protection from noise pollution is essential to their survival.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Lee Bennett

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Chris Talbot-Heindl

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Donna Crane

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

Dear,

Hello! I STRONGLY URGE YOU TO ABANDON YOUR PROPOSAL TO DISRUPT THE TWO WASHINGTON WILDERNESS AREAS by adding two more airspace training areas in addition to the two existing ones. Here are my comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

THE DRAFT EA IS INADEQUATE IN ITS ANALYSIS OF THE IMPACTS ON THE WILDERNESS. For example:

CONGRESS EXPLICITLY IDENTIFIED AND PROTECTED BOTH SOLITUDE AND QUIET IN WILDERNESS AREAS. They specifically identified solitude and quiet as important values. Yet the draft EA fails to address those. It does not analyze them. The fact that jet noise may not cause human hearing loss on the ground (mentioned in the EA) is ONLY A SINGLE ELEMENT that must be considered when analyzing solitude and quiet. Americans expect, deserve and are legally entitled to solitude and quiet when visiting national parks. We live in a supremely noisy world. Solitude and quiet are rare outside our national parks. Americans who seek them in national parks should never have to worry about sudden massive noise that shatters the very solitude and quiet they go there for. In my city we have military training flights with some frequency – and I support continuing or expanding those rather than abusing wilderness areas explicitly designated for solitude and quiet. To think that I would be in a wilderness area -- investing lots of money and time to be there -- and suddenly be totally deprived of the very thing I came to get, is unthinkable. And illegal. I'd rather you continue conducting military training flights over already-noisy areas like my city.

THE DRAFT EA DISMISSES NOISE IMPACTS ON HUMAN VISITORS WITH FALSE REASONING -- 'most jets would only fly Monday through Friday.' Are you honestly suggesting that the Americans who use wilderness areas during the week on vacation, or in an effort to avoid weekend crowds, don't count? Are you honestly suggesting that Americans should be forced to seek solitude and quiet ONLY on crowded weekends or suffer massive jet noise? Are you honestly suggesting that Americans ONLY visit Wilderness on the weekends, doubling the crowds and the noise? Are you honestly suggesting that Americans ONLY visit Wilderness areas during crowded noisy times (weekends) or during uncrowded noisy times (Monday-Friday)?.

A CRITICAL PART OF WILDERNESS AREAS IS ALSO THE WILDLIFE. These areas were set aside by Congress to provide for the entirety of the wilderness, INCLUDING wildlife security and well-being. The ear-splitting noise from military aircraft will certainly disrupt their behavior and cause unneeded stress. Animals have hearing up to thousands of times more acute than humans!

THE NO ACTION ALTERNATIVE IS the best choice in this draft EA.

A FULL ENVIRONMENTAL IMPACT STATEMENT (EIS) MUST BE CONDUCTED, IF THIS PROJECT MOVES AHEAD, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

THE BOUNDARIES OF ALL EXISTING MOAS AND ATCAAS SHOULD BE RE-drawn to eliminate all overlap with designated wilderness areas

Sincerely,

Nancy Campbell

**Date:** Friday, February 16, 2024 7:00:12 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

Dear,

Dear U.S. Navy personnel,

Yes, I adopt the following letter, which you have already received many times over. I add my personal experience as one who lives in the country. When military jets, presumably from the military base in Pensacola, fly over our property the horses are terrified and gallop away, the dogs pull their ears back and run back to the house, the wild song birds go quiet. That extreme stress is not good for the animals and on a repeated basis will strongly impact their long term health and can cause genetic alterations that will negatively impact the species. We have enough attacks on our environment and health. Please come up with something safer somewhere else. Thank you.

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude. Predators and prey animals depend upon silence to succeed.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA. Why can't the jets fly out over the ocean? They would disturb the least amount of life below and I would think there would be far less commercial air traffic, which is what initiated this whole expensive study to begin with.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness. Not that that ever stopped the US Navy.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Kelly Eigler

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Trois Moore

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

**Date:** Friday, February 16, 2024 5:38:39 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Leonora Xhrouet  
4410 SW 102nd Ave  
Davie, FL 33328

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Fernando Martinez T

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Please, please, please -- we desperately need to save our remaining wild spaces -- they are a huge part of what you are training to protect!!!!

Sincerely,  
Dorothy Chao

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Samantha Gitman

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Weldon Williams

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Sylvia Wessels

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Rebecca Taurog

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Tricia Satifka

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.
