Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
J. David Scott

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

Dear,

Dear U.S. Navy personnel,

I served for two years at the Pensacola NAS, and rose to the rank of Lt. Cmdr. there, so am well aware of the need for adequate and appropriate air space for training new pilots, as that was the major focus at Pensacola. Unfortunately, training over federally designated wilderness areas is neither appropriate nor even legal. For that reason, I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Priscilla Skerry

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Dear,

Dear U.S. Navy personnel,

We wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA completely ignores the huge truth that wilderness is for wildlif as well as for people!!. These areas were set aside to provide for their security and well-being.

Clearly and irrefutably,the sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Wildlife cannot live in such an environment, which means these wilderness aras become toxic to wild creatures!

The Draft EA is completely inadequate in its so-called analyzes of impacts on Wilderness

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Your actions and inactions regarding this and all related concerns have been, are being and will be remembered by all of us who will live in the world that you are shaping with your decisions right now, in addition to being a matter of public record. We are all on it together. Environmental emergencies are affecting everybody's health and livelihood, and will do so for generations to come. All issues need to be considered as facets of the critical state of the biosphere.

Given the consistency with which each current and foreseeable crisis has been weaponized against the vulnerable majority of the population of the United States of America and the world, and the exceptional leniency shown toward — not to mention the overwhelming subsidization of — those industries that create and perpetuate these crises, any failure on your part to directly address and act upon these issues can only be seen as complicity in extinction and a clearly genocidal agenda.

Thank you.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

**Date:** Thursday, February 15, 2024 1:16:48 PM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Blaine Converse  
927 Newsome Ct  
Goochland, VA 23063

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Christine Popowski  
2630 Pleasant Avenue #101  
Minneapolis, MN 55408

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Nina Aronoff

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

I send my comments to give voice to the wildlife living in these areas, who have no control over the presence of jets in their homes. We must protect their wellbeing - we owe it to them, for sharing this planet with them is a gift we must nurture. TY

Sincerely,  
Magdalena Sikora

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Katherine Flickinger

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will totally shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is ludicrously inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Wilderness areas are established (or will be established) for many reasons. Those Wilderness areas are under constant pressure that will eliminate or degrade those qualities which make Wilderness so special and worthy of protection for all of us. One of those pressures now comes from the US military which is attacking Wilderness areas for questionable, ill-advised, misleading, and dubious reasons. They've made incredulous claims that have no place in rational, well-reasoned, sensible, intelligent, or credible discussion. Wilderness should not be needlessly sacrificed for illogical, misleading reasons.

Thank you.

Sincerely,  
Mike Rummerfield

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

I live on the Olympic Peninsula where incessant, high-decibel noise from Navy Growler jet training impact the wilderness of Olympic National Forest and Olympic National Park, a World Heritage site. Rather than expanding jet training in Washington, move these noisy jets elsewhere, where they will not degrade the natural sounds of wilderness or the peace and quiet of human communities.

Regarding the Draft EA;

It inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

**Date:** Thursday, February 15, 2024 1:02:00 PM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Kellen dunn  
1210 Dayton Street  
Madison, WI 53707

Dear,

Dear U.S. Navy personnel,

Our pristine, protected lands need to remain that way. These are the most significant gifts we can pass on to our children. It is urgent that we continue to uphold and increase the legislation geared toward protecting them. Please stand firm against these attacks on their welfare.

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

**Date:** Thursday, February 15, 2024 12:59:24 PM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Danial Asadolahi  
1238 Richards Street  
Vancouver, BC V6B 6M6

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Esther Leonard  
154 Cedar St  
Huntington, WV 25705

Seems the navy considers sacrifice zones, but they are wrong. Wilderness is not set aside until someone thinks they have a better idea. Wilderness areas are set aside for peace, quiet, wildlife, and keeping a part of our planet as it was originally designed.

Thank you.

Sincerely,  
Henry Berkowitz

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
ronald brown

Dear,

Dear U.S. Navy personnel,

As an outdoor enthusiast and someone who understands the value of outdoor spaces that are untarnished by human interference, I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness by making misinformed, overly simplistic, and conveniently arbitrary assumptions. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude. This is why we don't allow private citizens to use drones in many outdoor locations. It severely compromises the experience and the health benefits that are associated with it.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence. I am one of those people and have chosen a career that allows me to have multiple weekdays free for added solitude and silence. Identifying Mondays-Fridays as inconsequential is misguided and pointlessly arbitrary.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break! Have some empathy, and acknowledge that you may not know everything about how humans affect wildlife. I strongly recommend watching *The Year the Earth Changed* on AppleTV if you think this human activity is inconsequential to the well-being and protection of wildlife.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Luke Brenneman

Dear,

Dear U.S. Navy personnel,

As an active user of the Pasayten and Lake Chelan-Sawtooth Wilderness areas, I am concerned about the proposed Eastern Washington Airspace Extension. Please accept my comments on the Draft EA:

The Draft EA inadequately analyzes impacts on Wilderness.

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. While jet noise may not cause human hearing loss on the ground (which the EA mentioned), it will shatter solitude. Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. For significant portions of the year, use is at a maximum all week long, and even when it is not, those who visit during the week often do so to maximize opportunities for solitude and silence. Equally important, these areas were set aside to provide for the security and well-being of wildlife. The sounds from military aircraft will disrupt behavior and cause stress.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you for your serious consideration.

Sincerely,  
Amy Carlson

**Date:** Thursday, February 15, 2024 12:49:37 PM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but were not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will certainly shatter solitude!

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Keith Henderson  
19 Grove Pl

**Date:** Thursday, February 15, 2024 12:47:21 PM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Linc Conard  
1750 N Altadena Dr  
Pasadena, CA 91107

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Greg Zahradnik  
1239 Royal Ave  
Louisville, KY 40204

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude. I have been lucky enough to have been in wilderness areas in California, Baja California and elsewhere many times. Noise such as that from jet aircraft is definitely an unwelcome intrusion.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Please give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Paul Cooley

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Kristen Bossert  
121 Ellison Dr  
Milton, DE 19968

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
John Teevan

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Kristin Ekvall

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

Dear,

Dear U.S. Navy personnel,

PLEASE protect Wildlife when making decisions about where to fly your jets. Wildlife NEEDS wilderness areas, and the harmful impacts of noise pollution can be very damaging to the birds and mammals that live in these areas. Yes, there are fewer humans in wilderness areas, and I understand that you do not want to disturb humans with this noise, but that does not justify subjecting wilderness areas to this same noise.

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Tim Durnell

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension. MAINLY, WE DON'T NEED ANY MORE MILITARY BULLSHIT! The Pentagon is out of control, and no one is threatening the U.S. - the military needs to CALM DOWN!!!

LEAVE OUR WILDERNESSES ALONE! You're killing our ecology, our innocent animals and birds and insects!  
STOP ALL THIS MILITARY CRAP!

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Ann Hansen

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Martin Robbins

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Lydia Barbarini

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

I am a user of the outdoors, especially wilderness areas, where I camp and hike. I am truly annoyed by jet traffic over places where I expect only to encounter the sounds of wildlife and to find peace, quiet, and relaxation from our modern mechanized world. Please don't let the Navy impinge on the areas mentioned below with the sounds of jets.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Charles Parent

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension. The airspaces would overlap two Wildernesses—the Pasayten and Lake Chelan-Sawtooth Wildernesses—and threaten to destroy the solitude and silence found there. Your help is needed to protect these great Wildernesses. Don't destroy our Wilderness Areas.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Rena Lewis

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Jaime Martin

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Susan Crockenberg

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Shadoe Drury

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Dear,

Dear U.S. Navy Facilities Engineering Systems Command Northwest;

As a long time backpacker in our wildernesses, I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness.

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

In my experience, I have found military jet noise to be highly disruptive of the wilderness experience.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday makes no sense and assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being, and the sounds from military aircraft undoubtedly disrupt their behavior and cause unneeded stress.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension. I am a life-long resident of Washington State and have spent much time in the North Cascades. While I respect the navy's need for adequate training, I am appalled by this proposal.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Christopher Finley

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension. Noise Pollution is Pollution! This is damaging to people and wildlife, destroying the benefits of the Wilderness. Practice elsewhere.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you. Kevin Byrne, MD

Sincerely,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Joyce Ciotti

Dear,

Dear U.S. Navy personnel,

I don't know about you, but I go to the wilderness to escape the noise and pollution that is inherent in most everyone's daily life. We have fewer and fewer places to go to just be in peace while surrounded by nature's beauty. It is already annoying enough to deal with commercial and private aircraft that violate my airspace on a daily and nightly basis. Some of those aircraft are military and are excessively LOUD. Animals have far more sensitive hearing than us humans, so while the aircraft are loud to my ears, I can only imagine how wildlife will suffer.

It seems to me that there are already plenty of current flight training locations that are sufficient and the damage to the local wildlife and citizens is already done. To shatter the peace and quiet of yet another Wilderness area for military use is completely unnecessary - and irresponsible. The negative impact on the wildlife that live there and the humans that visit there will be devastating.

Therefore, I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

**Date:** Thursday, February 15, 2024 11:43:34 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Evelyn Coltman

**Date:** Thursday, February 15, 2024 11:40:28 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

The flora and fauna in our world are assailed by human impact whether on land sea or air. We must give respect to these lives by our absence before it's all gone. Once gone no conservation will replace the assailed.

Thank you.

Sincerely,  
Cinda Johansen

**Date:** Thursday, February 15, 2024 11:39:37 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Stuart Weiss

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Sandra Lubrano  
210 Woodhollow Drive  
Marlton, NJ 08053

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Patricia Mensing

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

I believe the No Action Alternative is the best choice in this Draft EA.

In addition, I would like to see a full environmental impact statement (EIS) conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. Animals are there 24/7; the Wilderness is their home. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude. Has anyone verified that these jets will not cause animals in the wilderness areas or nearby to suffer hearing loss? Many animals rely on keen hearing ability for survival.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Avis Vidal  
22111 Woodward Ave. Apt 234  
Ferndale, MI 48220

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Sharon Zayac

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Sunil Misra

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
B. E.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Dear,

Dear U.S. Navy personnel,

PLEASE understand that The Wilderness Act of 1964 forbids any noise or air flights that violate compliance with the Act.

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude be out of compliance with the Wilderness Act!

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Debra Andrade

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

I write as a former resident of eastern Washington, where I taught geology at Eastern Washington University for 27 years. During that time I enjoyed several great backpacking trips in the Pasayten Wilderness. These were many-day trips, not just weekend outings. It is ludicrous to suppose that people who use and love wilderness do so only on weekends! I'm thankful I got to enjoy these trips without the noise of military jets, and I would like to see future generations have this same opportunity.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Christopher Evans  
Hearst Avenue  
Berkeley, CA 94720

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is unacceptable. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence, and would have their legal expectation of solitude violated by this proposed action.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unacceptable stress. Again, this action would have a consequence that Congressional designation of these lands protects from imposing upon them.

On summary, this proposed action is a direct violation of Congressional intent, and therefore is illegal.

The No Action Alternative is the only legally acceptable choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Lowell Smith

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Dan O'Keefe  
10414 SW 238th St  
Vashon, WA 98070

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Nancy Pichiotino

Dear,

To U.S. Navy personnel:

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

I oppose the creation of new military airspaces for jet training exercises in Washington State that overlap the Pasayten and Lake Chelan-Sawtooth Wildernesses.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is even more important for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.  
Martha Iancu

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Dear,

Dear U.S. Navy personnel,

I herewith submit my comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA fails to take sufficient notice of the importance of freedom from the noise of urban life that our invaluable Wilderness areas provide. We must not allow the military to invade the airspace and soundspace of our Wilderness areas. The US military is funded at more than the total of the next 8 or more countries. This is absurdly disproportionate and it damages US taxpayers every day, as well as drawing tax dollars from essential needs of Americans.

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed.

Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but IT WILL SHATTER SOLITUDE.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

These two new proposed air spaces would significantly overlap both the Pasayten Wilderness and Lake Chelan-Sawtooth Wilderness. The noise from the growler jets would startle wildlife and shatter solitude and silence in both Wildernesses.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

Sincerely,  
Dini DiNatale

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Scott Markey  
12700 Indian School Rd NE Apt #114  
Albuquerque, NM 87112

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the inadequate Draft EA for the proposed Eastern Washington Airspace Extension.

I have spent time in some of our country's wilderness areas, and the quiet solitude what one of the things I cherished and enjoyed the most. I spent a week or more in these areas so I was there during the week and weekend. Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate and unrealistic. Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Wilderness areas were set aside to provide safe and undisturbed habitat for wildlife. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Stress has been shown to reduce rates of reproduction. As more and more undisturbed habitat disappears, wildlife populations are decreasing and

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Joyce Suggs

Dear,

Dear U.S. Navy personnel,

As a person who actively recreates on various Federal lands including wilderness areas and national forests, I feel it is imperative that all the aspects of these natural spaces need to be protected. Military flight training is incredibly intrusive and disruptive to these natural spaces. I have direct experience of military flight training during the 12 years I lived in Nevada, where on multiple occasions I was overflowed at low altitude and high speeds by military jets. I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension. 1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
kajsa ingelsson

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

Dear,

Dear U.S. Navy personnel,

I hereby submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

#1.) The Draft EA inadequately analyzes impacts on our Wilderness. As example:

Solitude and quiet are wilderness values identified and protected by Congress, yet are not analyzed. arguably jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it certainly disturbs solitude.

Dismissing noise impacts on human visitors because most jets fly Monday through Friday is inadequate too~ assuming people only visit Wilderness sites on weekends. Those who go during weekdays often want to maximize opportunities for solitude~ to appreciate the sounds reflected in our natural world~ even silence.

Wilderness must take in to consideration wildlife! Such imperative areas were set aside to provide their sanctuary, security and well-being. Sounds from military aircraft will negatively impact their behavior causing unnecessary duress.

#2.) The No Action Alternative is the very best choice in this Draft EA.

#3.) A comprehensive environmental impact statement (EIS) must be conducted, should this project move ahead, to identify and fully analyze every impact from this proposal, including those to designated Wilderness.

#4.) The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Most sincerely,

Sincerely,  
Perry Kendall  
8307 Flourtown Ave  
Wyndmoor, PA 19038

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

Dear,

ATTN: U.S. Navy Officers in charge of decision re: Eastern Washington Airspace Extension

I hereby submit my following comments on the Draft EA for the proposed Eastern Washington Airspace Extension and support the No Action Alternative!!!

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Very truly,

Miss Lora Leland

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Renate Pealer

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Dear,

Dear U.S. Navy personnel,  
Regarding the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday assumes that people only come to visit Wilderness on the weekends. I know many people, especially now that people work from home, who visit during the week to maximize their opportunities for solitude and silence. Often tourists come on weekends making it crowded so if folks that live in closer proximity want to avoid those crowds, they come during the week.

Wilderness is also for wildlife and I'd say, mostly for wildlife. These areas were set aside to provide for their security and well-being. The noise from military aircraft will disrupt their behavior and cause unneeded stress. Often pregnant mothers lose their babies due to stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA. Don't sacrifice our wilderness and wildlife for this.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Ralph Guay

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension:

\*\*\*\*\*I have used both wildernesses when I lived in Washington . SOLITUDE AND QUIET ARE IMPORTANT when people use Wilderness. The eastern part of Washington State is rural and thus a perfect place for both wildernesses. The people on the western side of the state are wanting to escape to a rural area for their hiking experiences away from noise and congestion. PLEASE leave this air space void of airplane contamination. \*\*\*\*\*

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Eric Streett  
4924 Tyler St  
Hollywood, FL 33021

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Mo Kafka

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Wilderness is primarily to maintain natural habitats for wildlife. Wilderness areas were set aside to provide for wildlife security and well-being. The volume and disruption from overflies by military aircraft will certainly disrupt their behavior and cause unneeded stress and death.

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude, the opportunity to get away from roaring and polluting engines.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is NOT acceptable. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week - often seniors and young children - do so to maximize their opportunities for solitude and silence.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Liz Amsden

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Ken Barton

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Craig Drew

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Robert Megraw

Dear,

To U.S. Navy staffers,

Please consider my comments on the Draft Environmental Assessment ("EA") for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzed negative impacts on Wilderness, e.g.

Solitude and quiet are values identified and protected by Congress for wilderness areas and the impacts of the proposal need to be assessed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Negative noise impacts will be imposed on human visitors during anytime jets fly--and wilderness visitors will be present Monday through Friday, so the EA's dismissal of negative weekday flying impacts is inadequate. And, one cannot guarantee a "mostly weekday" flying schedule for Navy planes.

Wilderness is the home of significant wildlife populations. These areas were set aside to provide for the security and well-being of wildlife. The sounds from military aircraft will most certainly disrupt their behavior and cause unneeded stress.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

Negative impacts can be avoided if boundaries of all existing MOAs and ATCAAs are re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Gregory Ptucha

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

JUST BECAUSE PEOPLE DO NOT LIVE IN THE WILDERNESS, IT DOES NOT MEAN HUMANS CAN DO WHATEVER THEY WANT. THE NAVY CAN FLY OVER THE OCEAN AND USE FLIGHT SIMULATORS - STAY AWAY FROM WILDERNESS AREAS PERIOD.

IF THE NAVY WANTS TO FLY OVER LAND, WHY NOT WHERE YOU LIVE? DO SOME DIVE BOMBING RUNS OVER YOUR HOUSE - WOULD YOU LIKE THAT? THE NAVY MUST NOT DESECRATE WILDERNESS AREAS LIKE THIS.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

**Date:** Thursday, February 15, 2024 10:33:44 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Chad Fuqua  
3411 Springrock Ln  
Houston, TX 77080

Dear,

Dear U.S. Navy personnel,

Please accept the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

The USN can be a powerful voice that can help preserve and protect the wilderness and its resources for wildlife and future generations.

Sincerely,  
Larry Lambeth

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Melissa A Prescott  
167 McKinley Ave  
Massena, NY 13662

**Subject:** [Non-DoD Source] Eastern Washington Airspace Extension Draft EA  
**Date:** Thursday, February 15, 2024 10:28:54 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Joseph McDonough

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

I am quite familiar with the Pasayten Wilderness and object strongly to the Navy's plan to invade the air space above this wilderness. There is no reason whatsoever to militarize wilderness areas in any way, including in the skies above such areas designated as wilderness by Congress. Wilderness "values" do exist and have been so identified by Congress for perfectly reasonable reasons. Find another area to disturb and pollute with your infernal machines. And leave the wilderness alone!

Thank you.

Sincerely,  
Michael Shurgot

**Date:** Thursday, February 15, 2024 10:28:22 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Franklin Gould
