I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Tina Markowe  
10538 Eastborne Ave  
Los Angeles, CA 90024

Dear,

Hello, I am signing on to the e-letter below, but I would like to explain why. I am not at all against the military and military training. My father was an Army Veteran. My Uncle is a Navy veteran and I have a nephew very dear to me who is planning to go to the Air Force Academy. My family and I all also love Nature and wildlife. I ask you to please make sure that any jet fighter pilot training be done in places that have no to very low impact on wildlife. I believe that's possible to do. Thank you for reading this message. Thank you for your service. E-letter below.

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Krissa Dutton-Schandelmaier

**Subject:** [Non-DoD Source] Eastern Washington Airspace Extension Draft EA  
**Date:** Thursday, February 15, 2024 10:28:17 PM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Carrie Darling  
18032 N 2nd Street  
Phoenix, AZ 85022

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you for your concern in our Mother Earth

Marie Vanderbeeck

Sincerely,  
Marie Vanderbeeck  
Rue Taille-Madame

Dear,

Dear U.S. Navy personnel,

As a lover of this beautiful land of ours, I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA INADEQUATELY analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will CERTAINLY shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. As you can imagine, those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife!! These areas were set aside to provide for THEIR security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!!

The NO ACTION ALTERNATIVE is the best choice in this Draft EA.

A full environmental impact statement (EIS) MUST BE CONDUCTED, if this project moves ahead, to identify and fully analyze ALL THE IMPACTS from the proposal, INCLUDING those to designated Wilderness!

The boundaries of all existing MOAs and ATCAAs should be RE-DRAWN to eliminate all overlap with designated Wildernesses!

Thank you for your careful attention to these matters,

Sincerely,  
Hilary Young  
706 N Alvarado St, Apt 402  
Los Angeles, CA 90026

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Zara Ivanova

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension because it is a terrible idea.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

I appreciate your listening to me! Thank you.

Sincerely,  
Karen Good

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Robert Mizar

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
June Heilman

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

The US Military is already the most egregious polluter on this planet. Why add your noise to the mix. As Americans we should be so ashamed of the actions of the US Military. The destruction of habitats, the pollution of vast reaches of ground water, the use of BURN PITS, the destruction of the peace and quiet of the other major inhabitants of this planet Cetaceans by the absurd excessive use of sonar as a weapon.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

It is ludicrous to not fully respect the impact the noise has on the fauna in the WILDERNESS. It's supposed to be WILD , not destroyed by jets.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

I get that you think you won't be affecting anyone if you do the training "out there." You know what? you should affect the people who pay for those jets and do the trainings over the cities so we will know exactly what our money is being spent. LEAVE THE ANIMALS AND PLANTS AND ROCKS ALONE.

Thank you.

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Patricia Vance  
111 S Church Ave Unit 205  
Tucson, AZ 85701

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension. I personally have seen what you have done to my home state of Hawai'i. Red Hill you poisoned our water. On Haleakula you spilled diesel fuel. You spilled aircraft fire retardant 100 ft. from Oahu's largest aquifer. You destroyed Kalawhe, we had to clean it up. You do not get your unexploded ordinances you litter all over Pokahala on the Big Island. You state it is for safety reasons. Yet you do not consider that we want our land cleaned up. You billed my state to clean up Red Hill and we are suing. I have seen military leave their "party" trash all over our islands. You do not respect native lands. You do not respect native land or culture. If I have a say you should all be charged for the damage you inflict. There is no accountability, no teaching to the employees. Bad behavior comes from the top. Do not go somewhere else and destroy their land. You should pay for Red Hill and Koholawe. Yet you are not accountable.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

**Date:** Thursday, February 15, 2024 8:18:15 PM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Russell Weisz  
319 Laguna St  
Santa Cruz, CA 95060

Dear,

Dear U.S. Navy personnel,

I am submitting the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are Wilderness values identified and protected by Congress, but the draft EA fails to analyze them. Jet noise may not cause human hearing loss on the ground, but it will shatter solitude for humans and wildlife.

Dismissing impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Stress can result in wildlife miscarrying their young, expending much-needed calories, and abandoning dens and nests.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Frances Hartogh

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Eric Robson  
318 Island Dr Apt 20  
Madison, WI 53705

Dear,

Dear U.S. Navy personnel,

As a person who grew up on Air force bases across the US, my experiences with the noise of jets tell me you have seriously underestimated the impact of that noise on both the wildlife and the visitors to the wilderness areas in question.

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude. Please respect the qualities that wilderness areas are supposed to protect and find alternatives that are less sensitive.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
K Krupinski

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence. When I visit these areas it takes me at least a week to fully acclimate and find the peace I seek.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness and the wildlife who live there..

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Chris Eaton

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Rose Marie Wilson  
875 Jerusalem Ave  
Uniondale, NY 11553

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness -- an important component of Wildernesses. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

More importantly Wilderness is also for wildlife (ie not just you current day humans). These areas were set aside to provide for their (wildlife) security and well-being. The sounds from military aircraft will certainly disrupt their behavior as well as cause unneeded stress in the changed/unnatural environment. Impact must be discussed and included!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

Additionally, the boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Harriet Goldman

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Van Knox IV  
1330 Creek Rd.  
Lititz, PA 17543

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

Dear,

Dear U.S. Navy personnel,

We do not want the MOA military over flights on the Gila National Forest in southwest New Mexico either. I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Dear,

Dear U.S. Navy personnel,

I live near an US Air Force base, and I understand the impacts of noise from aircraft. I understand and appreciate the purpose to maintain military jet training. I have also been responsible for coordinating use of controlled airspace, thus I have some experience with the implications of designating such airspace over an area.

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA does NOT adequately analyze impacts on Wilderness areas. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed in the Draft EA. Jet noise may not cause human hearing loss on the ground (which the EA mentions), but it will shatter solitude and quiet.

Dismissing impacts from jet noise on human visitors because "most" jets would fly "Monday through Friday" is not a justified exemption or reason for tolerance. It assumes that people only come to visit Wilderness on the weekends. Many visit during the week, and those who do often do so to maximize opportunities for solitude and silence - and to possibly see wildlife that is not being frightened away by jet noise.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause stress. While we have already decimated much of their habitat and placed such limits on the range and territory of wildlife - the intent to impose regular noise stress across wilderness regions is shameful.

The No Action Alternative is the best choice in this Draft EA. It is the only choice that makes sense ... when you listen.

If this project moves ahead, a full environmental impact statement (EIS) must be conducted to identify and fully analyze the impacts from the proposal, including those to designated Wilderness areas, wildlife, and all users.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Jasper Hardesty

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Gavin Bornholtz

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension. First, the Draft EA inadequately analyzes impacts on wilderness. For example, solitude and quiet are wilderness values identified and protected by Congress but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Second, wilderness is also for wildlife. These areas were set aside to provide for animals' security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Therefore, the No Action Alternative is the best option in this Draft EA.

Finally, the boundaries of all existing MOAs and ATCAAs should be re-drawn in a way that eliminates all overlap with designated wildernesses. Thank you.

Sincerely,  
Elizabeth Edinger

**Date:** Thursday, February 15, 2024 6:13:40 PM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Lynda Caesara  
1619 Virginia St.  
Berkeley, CA 94703

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Ian Scofield

Dear,

Dear U.S. Navy personnel,

I am writing to you because this issue is very personal to me. I have been impacted by Navy jet noise over my home near Nas Whidbey for years. We cannot keep compromising our areas of solitude and wilderness to the sound of military jets on a daily basis.

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Diane Hart

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Ramsay Kieffer  
3829 Paradise Alley Rd

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness and wildlife. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed in your Draft EA. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. They deserve equal protection under the law.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Wilderness MUST be for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break! In an era when entire ecosystems are being decimated by the loss of various species within them, it is imperative that we protect wildlife at all costs. We are also a part of the biosphere and are impacted by the degradation of all the parts within it.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Barbara Childers  
P.O. Box 232 or 49 Shore Rd.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

I have spent a fair amount of time in these places of concern, when I am up in orchard country working. They are precious to me and IMHO should be protected.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude. These are beautiful parts of the world and deserve to be treated with awe and respect, as do the people who go there for those reasons.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence. People come there at all times, and to be assaulted with those sounds during the week is crazy-making.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break! They deserve respect!!!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

This is a horrible idea of how to treat these beautiful places. It makes me both sad and mad.

Thank you, please listen to us.

Sincerely,  
Karen Stingle

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break! NOISE created panic in the animal world. ....It creates injuries, loss of life and loss of everything serene they knew. Fly over a desert if you want to, not over the forest areas of living beings trying to have a home. Animals live there 7 days a week by the way..... not just the weekend.....when humans visit. I love military.... and have family members served.....but this is NOT right ..... DO NOT DO THIS. This is mutilation of innocent lives with paws, wings.....just trying to live. Allow them to in peace. PEACE is what military wants is it not? Do not do this. This is just PLAIN WRONG.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

**Date:** Thursday, February 15, 2024 5:26:37 PM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Richard Sherry  
414 Hickory St  
Bethlehem, PA 18017

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
G Levy

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress but are NOT analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it WILL shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!!

The No Action Alternative is the best choice in this Draft EA.

A FULL environmental impact statement (EIS) MUST be conducted, if this project moves ahead, to identify and FULLY analyze ALL the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Tammy Beck

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

We already have experienced the disruptive action of the military which flies low and loud over the Olympic peninsula and the Olympic National Park. That in itself is a travesty and this type of behavior should not be allowed over any other wilderness areas or national parks.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Martha Olavarrieta

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Ralph Fischet

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA ignores the essential concept of wilderness, why it is designated as such as well as inadequately analyzing the impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

---

Dear,

Dear U.S. Navy personnel,  
Save the silence! Our lives are already too noisy and interrupted! Our planet and our health are at risk here.

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Susan Ford

**Date:** Thursday, February 15, 2024 4:36:24 PM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Jane Broendel  
3909 Jocelyn St NW  
Washington, DC 20015

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Carol Anderson  
605 Roosevelt Dr Edwardsville, IL 62025

Dear,

U.S. Navy:

I offer these comments on Draft EA for proposed Eastern Washington Airspace Extension.

Draft EA inadequately analyzes impacts on Wilderness. For example: solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed, yet should be. Jet noise may not cause human hearing loss on the ground, as EA mentioned, but it will shatter solitude. Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on weekends. Those who visit during the week often do so to maximize opportunities for solitude and silence. Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. Sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

No Action Alternative is best choice in this Draft EA.

Full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Dear,

Dear U.S. Navy personnel,

As someone who must endure the Blue Angels air shows and their practice runs prior to the Annual event, I'm in shock that jet training would be allowed over a wilderness area. The noise is deafening. It rattles my windows. It's startling, deafening, maddening - and feels like I'm in a war zone. I can't even imagine how disruptive this would be to the wildlife who can't comprehend the threat posed by such noise and who won't be able to escape it.

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Therese DeBing  
935 Lighthouse Ave #14  
Pacific Grove, CA 93950

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Scott Meyer

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Diane Gentile

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Eric Tauer

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

**Date:** Thursday, February 15, 2024 3:41:52 PM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Jeff Czach

In the early 1980s I was backpacking in the Sierras. We were surprised by what we thought had to be two UFOs. We thought we were crazy until we saw the bat winged fighter jets in a future war. I thought they weren't allowed in the wilderness area we were in. But I guess that's not true. Military craft should not be allowed in wilderness areas, just like motorized vehicles and chain saws.

Thank you.

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Donna Marie Slack  
3609 Capulin Dr  
Loveland, CO 80538

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension. My goal in submitting these comments is to help urge Naval Facilities Engineering to work on true impact assessment for the Wilderness. Humans should be the stewards of this planet. In that light, we must stop using the environment purely for ourselves and acknowledge that the environment and wildlife have an equal right to be here. Since they can't vote or write, we must do it for them.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Diana Cowans  
5729 Fishermans Drive  
Bradenton, FL 34209

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Janice Dlugosz  
409 Compass Ave  
Beachwood, NJ 08722

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

I understand the need for training Naval aviators. My father was one in WWII; he flew a dive bomber, and sometimes spoke of his training. But we have a HUGE country, not one the size of New Jersey, and we should have enough room to train military aviators and have undisturbed wilderness. Both are important.

Thank you.

Sincerely,  
Mary Bristow

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
jon kiesling  
819 Greeley Ave  
Saint Louis, MO 63119

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Please don't let this ill advised plan happen. Thank you.

Sincerely,  
Carol Tavani MD

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Heather Nordin

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

I have lived in a semi-wilderness area where Navy planes did touch down/take offs to practice. The noise was horrible and unbearable. It affected me negatively and probably all the living creatures as well. A wilderness isn't a wilderness if you allow such disruptive noise. **DO YOUR JET NOISE SOMEWHERE ELSE THAT ISN'T A WILDERNESS AREA.** You will destroy the wilderness if you allow this to take place.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Sonja Plumb

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension. First of all, are you crazy planning to bomb wilderness areas? Have you considered the wildlife, water, air and soil such bombing can do.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Chad Evans

Dear,

Dear U.S. Navy personnel,

As a long time lover of wilderness, especially the Sawtooth, I am deeply concerned about the military's plans to run training flights over these delicate wilderness areas. I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
lynn marlin

Dear,

Dear U.S. Navy personnel,

Please consider these comments on the Draft EA for the proposed Eastern Washington Airspace Extension. We have so few quiet places, please respect the places that have been recognized as "wilderness quality" and keep them quiet.  
Thanks for listening.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

**Date:** Thursday, February 15, 2024 2:41:50 PM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Carrie Thompson

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Linda Myers  
9075 Playhouse Rd  
Petersburg, PA 16669

I retired after 22 years of active duty in the US Army, so I understand the need for military training. However, I also enjoy our outdoor wilderness areas. I lead groups into the wilderness on 5-7 day backpacking trips during which time the participants and I enjoy the remoteness and solitude. As much as possible, we time our wilderness excursions to avoid any weekend crowds and excess human-produced noise. Please help protect our nation's wilderness areas and the wildlife that inhabit them.

Thank you.

Sincerely,

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Kellie Smith  
13 Brandy Lane  
Deering, NH 03244

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Wendy MacAuley

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

**PLEASE DO NOT FLY JETS IN, OVER, NEAR, WILDERNESS AREAS.**

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

**SILENCE IS GOLDEN, PRECIOUS, AND HARD TO FIND. LEAVE THE WILDERNESS AS PURE WILDERNESS.**

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

**WHEN HELICOPTERS FLY OVER MY HOUSE, I AM GLAD THAT I DON'T HAVE RABBITS ANYMORE BECAUSE THEY STOMP AND BOUNCE AROUND WHEN FRIGHTENED AND WOULD HAVE KILLED THEMSELVES OR ALL OF THEIR BABIES. IT HAPPENED ONCE BEFORE I QUIT RAISING THEM.**

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

**ISN'T THAT REQUIRED?**

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Douglas Sphar

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

I fly from Boston nearly every summer to do a one or two week of backpacking in the Cascade Wilderness Areas. I always arrange my hike schedule to be through the week so as to have the solitude and quiet of the middle of the week. Being away from the noise and commotion of urban areas is a top reason I go for these hikes. Earth-shaking and often low altitude runs by military aircraft is entirely antithetical to my wilderness solitude. In fact, on two pas occasions I have been buzzed by Navy growler jets, once in the Glacier Peak Wilderness Area and once in the Pasayten Wilderness Area. Both times the aircraft were at roughly 1000 ft above the ground and tracking a narrow mountainous valley thus greatly amplifying the engine roar. Many years ago, I trained as a pilot in the Air Force and have a good sense of the necessity of frequent training to maintain skills. But there are many areas to practice military flights in Washington state without encroaching on Wilderness Areas.

I am alarmed that you plan to fly training missions over Wilderness and even mid-week, as if that would not have a very negative impact on my wilderness experience as well as the daily lives of the wildlife there.

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all

overlap with designated Wildernesses.

Thank you.

Sincerely,  
David Fenner

**Date:** Thursday, February 15, 2024 2:09:56 PM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Margaret Donharl  
1150 Orange Pl  
Boulder, CO 80304

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Monica Siegel

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Margaret Smith

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Debbie Godlove

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

I was in the US Navy and lived on several naval bases. The noise made by the airplanes was SO loud and would startle me awake or not, and I was from a metropolitan city and used to airplanes flying over my house. We should care more about the solitude of the wildlife. Don't know if they still do this or not, but back then there always seemed to be some hot dogger who wanted to break the sound barrier, just NO. Protect the wildlife, please.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Dear,

Dear U.S. Navy Officials,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes the immense impacts of the Airspace Extension on Wilderness, and seems to miss the key attributes of a wilderness designation:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed in this draft. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude, and certainly destroy the quiet.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Thomas Gorman

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Our environment, wildernesses and wildlife need to be protected against this sort of outside forces that will harm them. Please do not move forward with the Navy's airspace jet training exercises in Washington State which will not be good for the wildernesses there.

Thank you.

Sincerely,  
KATHRYN WATKINS

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Guenter Foit

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Sarah Ksiazek

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.
