Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Shani Schulman

Dear,

Dear U.S. Navy personnel,

We wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Charles Pfaeffle

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Dear,

Dear U.S. Navy personnel,

I want to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will destroy animals' peace.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Ashley Birmingham

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness, AND YOU DAMN WELL KNOW IT! For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

I am very much for defending this country from authoritarian politically fascist, racist and religious fanatics (including against those already born and living here) but ineptly making this country socially unlivable and its ecology and environment polluted, poisoned, and unsustainably renewable is just more HUMAN FOLLY, HUBRIS, and FLAT OUT STUPIDITY! So please, use your intellect and common sense by overlapping use or repurposing locations already devastated by human 'development' NOT DESTROYING MORE OF THE EVER-DWINDLING SELF-REGENERATING and SUSTAINING, CLIMATE CHANGE SLOWING and HUMAN LIFE DEPENDENT UNDISTURBED NATURAL WILDERNESS KEEPING HUMAN LUNACY ALIVE.

Thank you.

Sincerely,

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

You exist to kill people during war time NOT to kill our Wilderness! DO NOT overlap Wilderness boundaries!!

Thank you.

Sincerely,  
Steve Sleeper  
26423 Feathersound Dr  
Punta Gorda, FL 33955

Dear,

Dear U.S. Navy personnel,

My Dad was a Navy veteran from WW II, and even he would think this a pretty stupid idea for wilderness, so I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
L Saunders  
Fenwick Street  
Hastings, NZ-HKB 4120

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Donald Fatzinger  
520 Whitehall Rd.  
Reinholds, PA 17569

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

We have backpacked in the Lake Chelan wilderness and we would be appalled to hear military jets flying over it. This happened to us once while hiking in the Columbia River Scenic Gorge area in WA when a military jet suddenly buzzed overhead, bewildering us and disturbing the peace of solitude of this special place.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

I frequently spend time near the Chelan-Sawtooth Wilderness Area, and I know many people who live nearby. They live there because they want to live near wilderness, with all the quiet and respite from industrialized life that that entails. I have experienced a military jet flyover while in a wilderness area, and it is a disruptive, startling, and deeply unsettling experience. This expansion would be a gross intrusion on what protected wilderness is intended to be, and should not be constructed.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends, and that Wilderness protections only need to apply part-time.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Dear,

Dear U.S. Navy personnel,

As a supporter of Wilderness Watch, Earth Justice, the Wilderness Society and other environmental organizations, I am submitting the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Please protect America's wilderness areas from development, aircraft jet noise, pollution and other unnatural, deleterious environmental practices.

Thank you for considering this critical issue.

Sincerely,

Tom Schwegler  
Kansas City, Mo.

Sincerely,  
Tom Schwegler

**Date:** Thursday, February 15, 2024 10:13:16 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Rita Hogan  
123 4th Ave  
Olympia, WA 98504

Dear,

Dear U.S. Navy personnel,

Even though I live in California, I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension. I visit the Pasayten and Lake Chelan-Sawtooth Wilderness areas often as they are among my favorite wilderness areas. My concerns are as follows:

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

Dear,

Dear U.S. Navy personnel,

As a conservation biologist I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. In fact, it ignores critical aspects of the value of wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. This kind of stress can affect behavior and damage reproductive success.

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Ann Moureau  
46 Kielwasser Rd  
Washington Depot, CT 06794

**Date:** Thursday, February 15, 2024 10:08:21 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

The No Action Alternative is the best choice in this Draft EA.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Amira Mansour  
4615 Green Tree Lane  
Irvine, CA 92612

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Lisa Hanes Goodlander

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Noise pollution negatively impacts both wildlife and humans, increasing their stress levels.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

**Date:** Thursday, February 15, 2024 10:04:41 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Ron Murrin  
10171 Middle Grave Creek Rd  
Glen Easton, WV 26039

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

I am constantly flabbergasted by the audacity of humans! They continue to use the planet as their playground when we share this planet with so many other incredible beings. When I was backpacking in the Mt. St. Helen's region for solace it was beyond annoying for my sake when helicopter sightseeing trips buzzed over me. I can't imagine what it is like for the beings that live in these remote areas.

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behaviors from feeding grounds to breeding and birthing grounds to migration all of which will put already at risk species into further danger for extinction all caused by unneeded stress from low flying aircraft noise. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Diane Craig  
8525 SW Davies Road  
Beaverton, OR 97008

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Deborah Toland  
17811 Hall rd. NW  
Vaughn, WA 98394

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

5. The military is also a huge source of CO<sub>2</sub> along with other pollutants. If voters and citizens demand that our military stay within our borders, greater standards of living would be possible. We should not be policeman to the world and destroy the same while being police. Global warming is harmful to world crops and that makes for greater political instability which is due to military fossil fuel usage.

Thank you.

Dear,

Dear U.S. Navy personnel,

Why can't the military practice out over the Pacific?? That is only a few minutes flying time from the Pesayten - and probably closer if they are leaving Whidbey or McCord. So I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Terri Curry  
131 Penn Avenue  
Bala Cynwyd, PA 19004

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

**Date:** Thursday, February 15, 2024 9:58:47 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Elliot Gordon  
65 E Yale Loop  
Irvine, CA 92604

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Jennifer Koval  
552 Ranch Valley  
Fair Oaks Ranch, TX 78015

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

Our iconic American landscapes are rapidly diminishing and we do NOT need to sacrifice protected wilderness areas for the military. They have quite enough real estate they can use already.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Dear,

Dear U.S. Navy personnel,

Another ridiculous proposal to cut into another wilderness...no two wilderness areas.  
Just stop doing this to our public lands.  
An accurate count of those opposed must be conducted and used to make decisions which will affect generations to come.

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Catherine George  
1836 Locust St  
Napa, CA 94559

**Date:** Thursday, February 15, 2024 9:54:00 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Mitchell Dormont

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Sandra Denninger

**Date:** Thursday, February 15, 2024 9:51:11 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Brian Field  
10040 Raritan Way  
Thornton, CO 80260

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

I visit the wilderness areas of Washington during weekdays to avoid people. I am retired and most of the people I meet on the trail are retired. Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence. I have been in the Alpine Lakes Wilderness when these jets have flown over us dodging peaks and I found it unnerving and disrespectful of wilderness.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Barty Thompson

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

**THIS IS A MORAL ISSUE!** These wilderness areas are NOT “un-used open space” that can be damaged just because there are less people living there!!!

ALL wilderness areas **MUST** be protected from noise, oil/gas drilling and mining, indiscriminate logging and human intrusions, and wildlife **MUST** be protected! These lands were set aside because they were valuable on many levels and needed to be protected and preserved for ALL future generations!!!

I will be watching your actions on this issue, and, I VOTE!!!

Thank you.

Sincerely,  
J Moore

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Donna Chesner

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Can't you stay away from Wilderness? Flying lots of airplanes over Wilderness means it is not wilderness.

Sincerely,  
Rona Fried  
231 W Pulaski Rd  
Huntington Station, NY 11746

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

First of all, I have nothing against the military, per se. My husband graduated from the Naval Academy and, because there was no AF Academy at the time, then spent 21 years as an Air Force officer, with me at his side. He was a B47 and B52 navigator.

However,

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is begging the question. It erroneously assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence. Perhaps you should re-look at the statistics.

Wilderness is even more important for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress, which often leads to disrupted reproduction.

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) should be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you for your attention to this.

Sincerely,  
Katherine Delanoy

Dear,

Dear U.S. Navy personnel,

The Draft EA for the proposed Eastern Washington Airspace Extension is woefully inadequate. I wish to submit the following comments on it.

1. The Draft EA incompletely analyzes the harmful consequences for Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA did mention), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is absurd. It assumes that the Wilderness visitors who count come to visit only on weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is intended for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will disrupt their behavior and cause unneeded stress.

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) MUST be conducted if this project moves ahead, to identify and fully and objectively analyze ALL the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Carol Steinhart  
6205 Mineral Point Rd.

Dear,

Dear U.S. Navy personnel,

While we understand the need for Navy pilots to be adequately trained, we shouldn't have to sacrifice our wilderness heritage to do so.

That being said, I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Pamela Thinesen  
6165 Green Valley Rd  
Anoka, MN 55303

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Peter Abbrecht  
1352 Steamboat Run Rd  
Shepherdstown, WV 25443

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude. Solitude is a element of the character of wilderness, and it is protected by the Wilderness Act. It is also an aspect of Wilderness that I personally cherish.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week, which I usually choose, often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Research shows this. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA to protect wildlife and "outstanding opportunities for solitude", as required by the Wilderness Act.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Anne Dal Vera  
2913 Ringneck Drive  
Fort Collins, CO 80526

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
simona vergassola

Dear,

Dear U.S. Navy personnel,

Please see my comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

A. This Draft EA inadequately analyzes impacts on Wilderness. For example:

Quiet and Solitude are wilderness values identified and protected by Congress, but are not analyzed in your draft. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Your dismissal of noise impacts on human visitors because most jets would fly Monday through Friday is not adequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for WILDLIFE. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

B. The No Action Alternative is the best choice in this Draft EA.

C. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

D. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

**Date:** Thursday, February 15, 2024 9:38:00 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Emily Oaks  
PO Box 309  
Sterling, NY 13156

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Juliet Pearson  
19368 Tiger Tail Rd  
Grass Valley, CA 95949

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude. And it's very likely to cause damage to other species!

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Our (human's) extensive forms of pollution have saturated so much of the landscape! Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Dear,

Dear U.S. Navy personnel,

I submit the following comments to you in regard to the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude and an experience that is irreplaceable.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also critical habitat for wildlife. These areas were set aside to provide for their security, the last best places to support their existence; their well-being depends on intact, undisturbed land and water. The sounds and vibrations from military aircraft will certainly disrupt their behaviour and cause unneeded stress.

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyse all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wilderness Areas.

Thank you.

Sincerely,  
Denise Di Santo

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Amy Meyer

**Date:** Thursday, February 15, 2024 9:30:54 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Steve Petyerak  
436 Hathaway Ave  
Woodstock, GA 30188

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude. I have in wilderness areas in the past enjoying the quiet only to be buzzed by military jets. It was very upsetting.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Linda Schile-Bradley  
7004 Lassens Trail

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

Thank you.

CLEAN and "NEUTRALIZE" (make Earth sustainable!) all military Nothing is more wasteful of the Earth's energy-dynamo - wherein ALL its elements are either potential or kinetic energy - than its recombinant utility into the specie-cidal application Nothing is more wasteful of the Earth's energy-dynamo - wherein ALL its elements are either potential or kinetic energy - than its recombinant utility into the specie-cidal applications of the warring machinery.

The planetary energy-imbalance of our profit-driven, capitalism-run-amok, misanthropic, mission we've mindlessly created, financing fossil fuel extraction -- the driving force and intent behind that national, run amok mission of WASTE in its irresponsible misuse of stored

combustible energy, wasted by both its unreciprocated, hence, over-abused use for no-other reason but to cheapen labor costs, and in its insecure supply-chain delivery (not to mention the waste in accidental dumping of unused energized hydrocarbons where it suffocates all emergent organic replication: its REAL functioning reciprocate energy) after requiring hundreds of millions of years to be removed from our ecology -- is so cheapening and distorting the Planet's system dynamo, that everyone's sense of worth is (and is being) belittled and demeaned... not to mention what kind of devastation it is availing the verdurous and fecund resplendence of our ("OUR"--yours, mine, and our children's) bountiful, Edenic Earth!

The urgency of this request makes me so much more impatient that my already unsettled attention disassembles further unable to make scientifically clear in detailed explication (descriptive wording) the specific inter-relationships between and amongst everything, that is and will be, disrupted should you vote in further enterprising of this homicidal, impulse response to the ever-present human inclination to recoil or strike-out in fear.

However, I do have a good inter-disciplinary grasp that has enabled an awareness of the verity in the human mission to seek; "seek" in a mission of unifying autopoiesis while knowing from experience and more recently being made aware of what astronomy theorizes as 'quantum entanglement', that that unification impulse hinges a proportional, cause and effect connection amidst ALL (This, a joyous awareness to say the least!).

Able to cognize this joy, however, becomes debilitating when I intellectually ruminate on the tragedy of our collective commons, in this prevailing climate confusion, for any duration beyond an instance of thought-leveraging on tribulations indirectly related. When I do falter obsessively, my sense of dread becomes debilitatingly unbearable as I witness that uninformed 'fear-impulse' drive public policy and its budgeting priorities.

Sincerely,  
John Sonin  
2201 Crow Hill Drive  
Douglas, AK 99824

Dear,

Dear U.S. Navy personnel,

As someone who understands the value of Wilderness Areas, I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example: Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed in the draft EA. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude and stress the areas' wildlife. Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is lame, to say the least. It assumes that people only come to visit Wilderness on the weekends. Those like me who visit wilderness areas during the week often do so to maximize their opportunities for solitude and silence. You also seem to ignore the fact that Wilderness is also for wildlife. Too many humans treat Wilderness like an amusement park, there only for their pleasure and taking. These areas were set aside to provide for the security and well-being of wildlife. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Wildlife have enough stress in their lives due to human interference. Let's not add to it needlessly.

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you for taking my comments.

Sincerely,  
Mary S. Reed  
1135 Hampshire Hollow Rd

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Francis Blake  
1010 Peden St Apt 3  
Houston, TX 77006

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Daniel Diehl  
1220 S. York Rd  
Dillsburg, PA 17019

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Marylyn Stroup  
2276 Branson Road  
Fitchburg, WI 53575

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

**Date:** Thursday, February 15, 2024 9:24:25 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Barb Drake  
10748 Evanston Ave N  
Seattle, WA 98133

Dear,

Dear U.S. Navy personnel,  
Save earth

The U.S. Navy has proposed the creation of new military airspaces for jet training exercises in Washington State. Unfortunately, the airspaces would overlap with two Wildernesses—the Pasayten and Lake Chelan-Sawtooth Wildernesses—and threaten to destroy the solitude and silence found there.

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Anita Sullivan  
810 W Main St  
Festus, MO 63028

Dear,

Dear U.S. Navy personnel,  
Save  
Earth

The U.S. Navy has proposed the creation of new military airspaces for jet training exercises in Washington State. Unfortunately, the airspaces would overlap with two Wildernesses—the Pasayten and Lake Chelan-Sawtooth Wildernesses—and threaten to destroy the solitude and silence found there.

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

**Date:** Thursday, February 15, 2024 9:22:13 AM

---

Dear,

Dear U.S. Navy personnel,

I write regarding the Draft EA for the proposed Eastern Washington Airspace Extension.

The Draft EA inadequately analyzes impacts on Wilderness in many significant ways.

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress.

The best choice in this Draft EA is the No Action Alternative.

A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Henry Lischer

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Sean Hunt

**Date:** Thursday, February 15, 2024 9:19:57 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Stuart Rubinow  
19 Thatcher Street  
Brookline, MA 02446

Thank you.

Chronic noise exposure can affect animals over their lifespan, leading to changes in species interactions and likely altering communities.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Paul Nasvik

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

This is my opinion which includes ALL WILDERNESS areas in the US. Wildlife will be gravely affected and people will too. Untenable.

Sincerely,  
Randi Young  
538 Aspen Dr  
South Fork, CO 81154

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

We urge you Not to expand the airspace!

Sincerely,  
Sam Hirsch  
18760 Frankfort st  
Northridge, CA 91324

Thank you.

I've lived in Virginia Beach where there was regular jet noise, a necessary inconvenience. And I've enjoyed getting away from noise while hiking. Jet noise would absolutely ruin a wilderness experience and scare wildlife away.

Sincerely,  
Gina Haschke

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Ann Brennan

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Cheri Gaspero

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

**Date:** Thursday, February 15, 2024 9:13:03 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Kenneth Lapointe  
2781 Mozart St  
Los Angeles, CA 90031

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Catherine McNamara  
2152 Torchwood Dr  
Orlando, FL 32828

**Date:** Thursday, February 15, 2024 9:11:49 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

**Date:** Thursday, February 15, 2024 9:10:28 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Johanna Maciaga

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Michael Noack

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Clyde Zaloudek

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Jo Ann MacDonnell  
14-10 Morlot Ave  
Fair Lawn, NJ 07410

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

WILDERNESS should be treated as Wilderness! Allowing this action and noise in a wilderness area as though the only impact would be upon humans? The wildlife in these areas will be even more impacted by this kind of noise.  
NOT necessary!

Sincerely,  
Maggie Frazier  
134 Dunbar Rd  
Windsor, NY 13865

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

I can go to Air Shows in various places to hear and see jets. Those usually happen on weekends.

I can only hike in quiet solitude in Wilderness. That is every day, and the weekdays are the quietest ones that I prefer.

Sincerely,  
Kathie Kingett

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Carl Warren Pope

**Date:** Thursday, February 15, 2024 9:04:44 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Gigi Cole  
221 Woodmill Drive  
East Windsor, NJ 08512

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Cathie Ernst

**Date:** Thursday, February 15, 2024 9:03:34 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Donald & Gerda Nightingale  
11 Nord Circle Road  
North Oaks, MN 55127

**Subject:** [Non-DoD Source] Eastern Washington Airspace Extension Draft EA  
**Date:** Thursday, February 15, 2024 9:02:05 AM

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Mark Fanatico  
211 Country Ln  
Boone, NC 28607

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

The vast Military Zones which already exist in the United States of America are extensively adequate, and should be considered more than enough for any, and/or all military maneuvers. Protections for wilderness areas should be expanded, not reduced.

Sincerely,  
cheryl schiafone

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Sofia Gutierrez

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

We must have protected areas such as this for the wellbeing of all.

I live in Madison WI & experience first hand the negative effects of the F35's stationed here. The damage is far reaching.

Please do everything you can to protect this area.

Sincerely,  
Barbara Switzky  
4728 Poplar Creek Dr  
Madison, WI 53718

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Tom Burt  
3863 Center Ave

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

---

Dear,

Dear U.S. Navy personnel,

I wish to submit the following comments on the Draft EA for the proposed Eastern Washington Airspace Extension.

1. The Draft EA inadequately analyzes impacts on Wilderness. For example:

Solitude and quiet are wilderness values identified and protected by Congress, but are not analyzed. Jet noise may not cause human hearing loss on the ground (which the EA mentioned), but it will shatter solitude.

Dismissing noise impacts on human visitors because most jets would fly Monday through Friday is inadequate. It assumes that people only come to visit Wilderness on the weekends. Those who visit during the week often do so to maximize their opportunities for solitude and silence.

Wilderness is also for wildlife. These areas were set aside to provide for their security and well-being. The sounds from military aircraft will certainly disrupt their behavior and cause unneeded stress. Give them a break!

2. The No Action Alternative is the best choice in this Draft EA.

3. A full environmental impact statement (EIS) must be conducted, if this project moves ahead, to identify and fully analyze all the impacts from the proposal, including those to designated Wilderness.

4. The boundaries of all existing MOAs and ATCAAs should be re-drawn to eliminate all overlap with designated Wildernesses.

Thank you.

Sincerely,  
Chelsea Norvell  
280 Elliott Rd  
Coviche, WA 98923
